

# Free Contract

Free Contract · Chain Finance

A dark, atmospheric photograph of a person wearing a hooded jacket. They are holding a laptop open, and the screen displays a large, glowing Bitcoin logo. The background is dark with some blurred lights, suggesting a nighttime or indoor setting.

## Blockchain Finance: Security + Freedom + Fairness

The emergence of encrypted digital currency is a revolution of the financial media. It brings more secure transactions. The operation mode after using blockchain and encryption technology can ensure the effectiveness and security of transactions.

All operations of DeFi are performed by smart contracts and open source code. There are no black case and no private information to be reviewed or utilized. All data is open and transparent, and there is no need for mutual trust or any barriers to entry. Anyone can make fair transactions in any way.

## **Introduction**

Project background, technical architecture and product types

## **Operation Guide**

Tool recommendation, introduction to the participation process

## **Recommendation Mechanism**

Ultra-deep network construction to obtain higher rights

## **Common Questions**

User manual, in-depth understanding of the core mechanism

## **Free Contract** Introduction

Free Contract (FC) is an open source and transparent blockchain application DAPP, developed based on the Ethereum main network. Is a distributed, fair, and just smart contract financial practical management game.

## **Free Contract System Core Value**

Create a 100% community-led fair and just smart contract financial world, and bring social value through real smart contract applications.

Let players control the direction of wealth through open and transparent data in the virtual world.

FC helps all dreamers keep up with trends and succeed.

# Free Contract Bottom Technology and Product Features

Ethereum Virtual Machine decentralization will never block the network, and never stops

Flat system design, maximum fairness, equal profit opportunities for members, fair rules

Based on Ethereum smart contract, it is the most advanced and stable public blockchain platform

The system is open source on github, it can withstand verification, no black case operation, transparent and without traps

Refuse the "high-return income to deceive big funds" routine. The investment threshold is low, the cycle is short and flexible, and it goes in and out constantly.

Control the bubble, 100% of the prize pool ETH is allocated, all funds are stored at the designated contract address, and no investors are exposed to money running out risk

# Free Contract Contract Types

---

## Plan A: Accumulated Income

Investment limit : 0.5~5 ETH, no lockup mechanism, follow in and out, ETH will generate the first reward by 24 hours after entering the contract.

Revenue details : 0.1% on the first day, 0.2% on the second day to 1.5% on the 15th day, no income will be generated after 15 days, if you need to continue to make profits in this contract, you can reinvest.

If you invest 1 ETH, the cumulative change in daily income  
for 15 days

# Free Contract Contract Types

---

Plan B: Flexible lock-up and huge profit

Investment grade limit:

Gold/0.5~1 ETH Platinum/1.1~3 ETH Diamond/3.1~5 ETH

15 days investment, 15% return

15%

30 days investment, 35% return

35%

45 days investment, 55% return

55%

## **Free Contract Operation Guide**

---

Unlike other decentralized products, FC is a decentralized platform that cannot be tampered with based on smart contracts. You do not need to log in to the website or download an exclusive APP. You need to enter the product through the DAPP browser of the ETH wallet (on chain).

## Recommended Wallet Entry

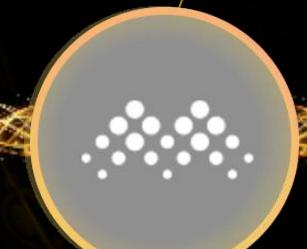

Please do not use a centralized wallet (such as currency letter, exchange), only the decentralized on chain wallet can enter the FC system.

Bitpie

imToken

Wheat Wallet

Little Fox  
MetaMask

Others  
COBO/虎符/TokenPocket等

# Free Contract How to Participate

---

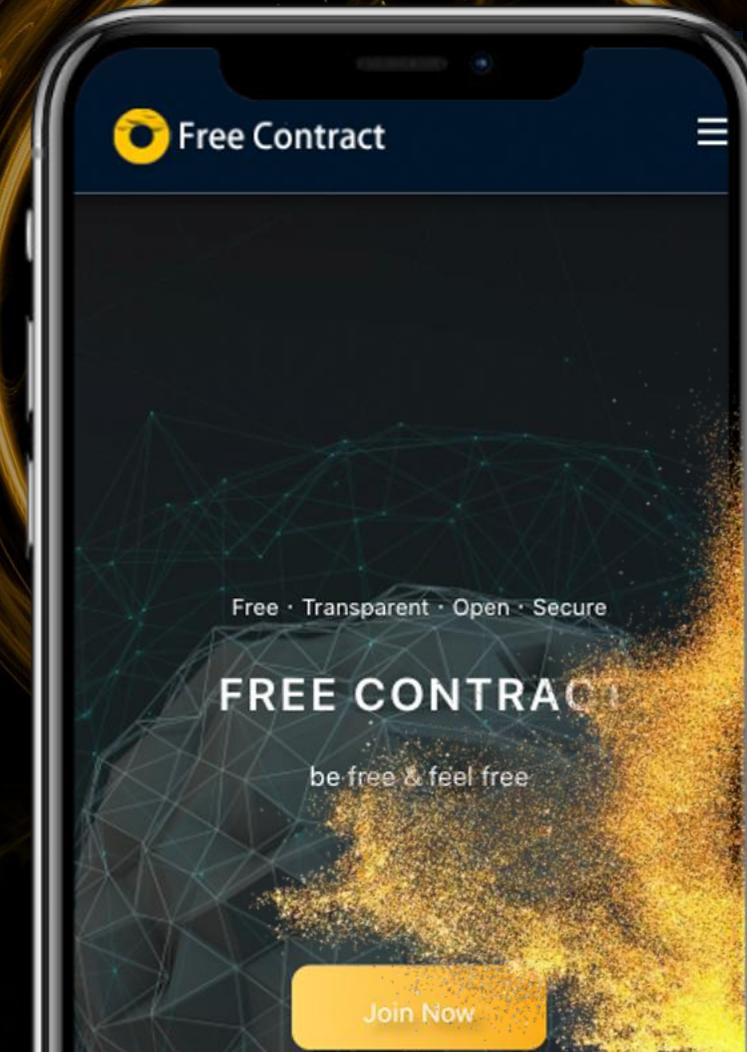

Participation method 1:

You can enter the link address in the ETH wallet DAPP browser such as Bitpie/imtoken/Wheat:

~~~~~

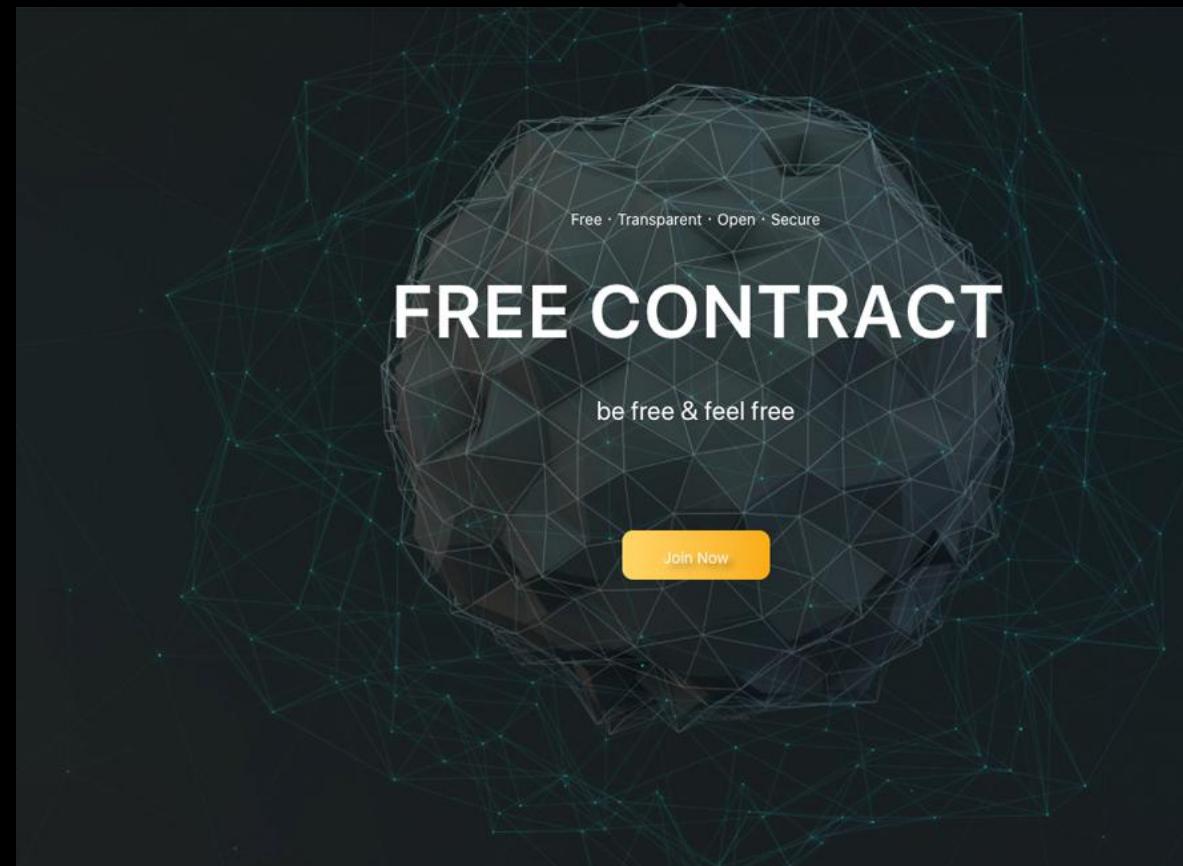

After entering the interface, click "Join Now" to participate in the game;

Deposit ETH to the platform contract address, click Store and click Send after the operation instruction.

## How to Check Your Investment Reward Records

Enter the FC platform from the ETH wallet DAPP browser, and select [My Transaction] or [My Contract] in the menu bar to check your deposit and reward records.

## **Free Contract Recommendation Mechanism**

---

FC's unique deep net construction, one recommendation, multiple profits.

# FC Recommendation Mechanism

Two kinds of contracts, the same network recommended bonuses are immediately received

## Plan A

The recommended bonus is calculated according to the net members' daily income, and the daily dividend

## Plan B

The plan recommended bonus is calculated according to the contract period selected by the net body member, and the dividend is distributed immediately

## Recommended Reward Standards

---

| Membership Level    | ETH Limit | 1st Generation Commission | 2nd Generation Commission | 3rd Generations Commission | 4–7th Generation Commission | Unlimited Generation |
|---------------------|-----------|---------------------------|---------------------------|----------------------------|-----------------------------|----------------------|
| Golden Membership   | 0.5–1     | 30%                       | 20%                       | 10%                        | 0                           | 0                    |
| Platinum Membership | 1.1–3     | 30%                       | 20%                       | 10%                        | 5%                          | 0                    |
| Diamond Membership  | 3.1–5     | 30%                       | 20%                       | 10%                        | 5%                          | 1%                   |

## **Free Contract Common Questions**

---

Notes and Common Questions About FC

## **1. Free Contract Who Initiated the Project?**

FC is a completely decentralized and open source platform. All business systems are written into smart contracts. FC development community members come from all over the world, including early development members of the Ethereum community, and economic model design experts.

## **2. Free Contract Who is Running the Project?**

The sponsoring team is the design creator of the project but not the operator. FC has been developed on the ETH public chain. When the smart contract starts running on the chain, it will never stop. No one (including the developing team) can tamper with the program and financial data to avoid the possibility of Ponzi schemes and external attacks.

## **3. What Currency to Use for Investment? What Asset Is the Reward?**

Because the system runs on the ETH public chain, the FC system only supports Ethereum ETH to participate in investment, and the rewards obtained are also the ETH rewards automatically issued by the system.

---

#### **4. Where Can I Find Open Source Technical Codes?**

On GitHub, the world's largest open source technology community, the open source code link is:

<https://github.com/FreeContract/FreeContract>

---

#### **5. How to Check the FC Fund Pool and Financial Flow on the Chain?**

Enter Ethereum official website <https://etherscan.io>, Enter the FC contract address in the search box:

0x04297D1526B614975ACF16299C62C6706085F082

In the page, you can check the details of the fund pool and financial flow.

---

#### **6. What Are the Risks of Participating in FC Contracts?**

There are bubbles and risks in all money management games. The key is to analyze and compare the bubble size and the reliability of the business model to solve the fund liquidity. The FC risk is that the future business model is outdated, causing no ETH enters the market and the capital flow would be broken, as well as the bonus pool ETH depletion.

---

## **7. How to Participate in the Game to Deposit and Withdraw Money?**

After entering the product through the ETH wallet DAPP browser entrance "register on the chain", follow the prompts to directly transfer ETH to the contract address to participate in the game.

---

## **8. What Do I Need to Pay Attention to Participate in FC Community Games?**

Because FC is developed based on the ETH public chain and runs on a decentralized chain in accordance with smart contracts, so for your assets safety, make sure to keep your wallet key and mnemonic words.

---

**Welcome to Free Contract!**

**This is a unique NEW GAME!**

THANKS
